Marico Ltd

Initiatives in place to drive growth

- Domestic 4Q sales volume/value remained subdued at 3%/ (3.8) yoy, impacted by weak consumption and muted growth at the mass-end of the portfolio.
- Initiatives announced to improve the distribution reach in general trade channels as well as scale up foods and D2C brands in a profitable manner.
- Marico is priced fairly at 42x/37x FY25F/26F EPS, respectively. Retain HOLD rating on it with a higher TP of Rs580 (41x Mar 2026F EPS) from Rs550 earlier.

Rural markets perform better than urban markets in 4QFY24

Marico's 4QFY24 domestic sales declined by 3.8% yoy, which its management attributed to lower consumption, aggression by smaller payers in mass categories and softness in the general trade channel. Volume growth stood at 3%. Parachute rigids reported +2%/+2% volume/value growth, respectively, while the Saffola edible oils range declined by 16%. VAHO posted a 7% yoy value decline. The food business grew by 24% yoy. Urban market growth moderated while rural market growth witnessed a marginal uptick in 4Q. Marico has taken corrective steps to alleviate the challenges in its general trade channel by inventory reduction and it plans to boost the channel further going ahead via trade schemes, promotions, etc. Management has unveiled Project Setu, a distribution expansion initiative to expand the direct reach from 1m in FY24 to 1.5m by FY27F and will set aside Rs8-10bn over three years from internal accruals for the same.

Bangladesh biz is expected to continue posting double-digit growth

The international business division or IBD posted a 10% constant currency (CC) growth in 4QFY24. Bangladesh sales bounced back, growing 6% yoy in constant currency or CC terms. Vietnam business was flat yoy in CC terms while South Africa and the MENA region grew 13%/19% yoy in CC terms, respectively. Management is confident of driving a double-digit CC growth for the IBD in FY25F. Reported sales were affected by currency depreciation in key markets.

Focus will remain on driving profitable growth in the medium term

The consolidated gross margin/EBITDA margin expanded by 630bp/270bp yoy to 51.3%/21.2%, respectively, in 4QFY24, benefitting from deflationary commodity prices. Prices of copra are likely to remain firm, with an upward bias. Management has laid out initiatives to drive its diversification agenda, with a strong focus on profitability.

Maintain HOLD rating with a higher target price of Rs580

At the CMP, Marico looks priced fairly. We retain our HOLD rating on the stock with a higher target price of Rs580 (41x Dec 2025F EPS) from Rs550 earlier. Upside risks: Faster recovery in the core portfolio and sustained higher margins. Downside risk: Slower-than-expected sales growth.

SOURCE: INCRED RESEARCH, COMPANY REPORTS

Initiatives in place to drive growth

Key highlights from the earnings call

Demand and operating environment

- **Demand:** Volume growth of the sector has been stable despite inflation and a slower-than-expected recovery in rural demand.
- Urban market growth moderated while rural market growth improved slightly.
- The premium range continued to fare better than mass products.
- FY25F is likely to see a gradual uptick across urban and rural markets.
- Domestic volume growth was flat in 4Q. It is expected to improve consistently from 1QFY25F.
- **Outlook on rural/urban growth:** Marico witnessed an uptick towards the end of the quarter in rural markets. The core portfolio should see better rural growth. Benefits of Project Setu will be visible from 2HFY25F.
- **Channel-wise:** Alternate channels gained salience as the general trade or GT channel witnessed muted growth in mass categories. Spending on premiumization and D2C led to a large growth in alternate channels. GT will remain a large focus area going ahead. Initiatives like stock reduction and select credit extensions are underway to improve profitability in the channel.
- Project Setu:
 - o Distribution reach expansion slowed post Covid-19 pandemic.
 - Project Setu will be rolled out to expand from 1m direct reach to 1.5m by FY27F. Improvement in direct reach leads to better assortment and visibility in rural markets.
 - Total reach stands at 5.8m currently.
 - Weighted distribution to be improved in challenger brands.
 - Will also strengthen its position in North and East India, where Marico is slightly weaker currently.
 - Assortment in urban stores will also be improved. The focus will be on improving large-pack salience in alternate channels. In rural markets, the quality of distribution is being improved.
 - Marico will set aside Rs800-1000m for Project Setu by FY27F to be funded from internal accruals. A dedicated team is in place. This will be a big bet over three years.
 - More action expected in the regions where competitors are stronger. It won't be an all-India exercise but will be focused on certain states in a phase-wise manner with a sub region/cluster approach.

Segment-wise commentary

- Saffola edible oil: Trade channels have stabilized. Revenue growth is expected to trend in a positive direction in FY25F. 4QFY24 saw range advertising under Saffola (edible oils + foods). By 2QFY25F, price hikes are expected to be anniversarized (last price hike was towards the end of 1QFY24). We do not expect much volatility in the near term.
- VAHO: Optically weak quarter on a high base. The bottom of the pyramid continued to drag sales. Mid and premium segments fared better. Expects a more competitive environment going ahead at the mass-end (Shanti Amla and Sarson) led by shrinkflation and volume impact. Since last quarter, things have improved. Expects a gradual improvement in FY25F led by improvement in mass BPC categories in FY25F. In the next few months, the shrinkflation anniversarization will happen. The higher RPI-end of the business will be rationalized to improve market share.

- **Parachute:** Saw a steady recovery amidst loose to branded conversions. Market share improved by 50bp. The favourable trend is likely to continue in the medium term. Prices were hiked by 6% on select packs. Marico, in our view, may go for further hikes going ahead.
- Food business: Closed FY24 at 4x higher than in FY20. Will drive a 20% CAGR in food business over the medium term. Now the building blocks are in place. Will drive consistent improvement in profitability. Gross margin expanded by 800bp yoy in FY24. Will scale further. The food business is likely to double over three years. The oats business continues to scale well. Honey was the fastest growing in the category and it gained market share.
- **Digital portfolio** clocked Rs3,500m exit ARR. Beardo will move towards double-digit EBITDA margin in FY25F. Beardo + Plix can do Rs5,000m over the next few years.
- Acquired brands:
 - Plix: Traction has been encouraging.
 - Beardo: Marico has been methodical in expanding Beardo in offline channels. Experimenting a little bit. Salon channels are also being expanded.
 - o Just herbs now scaling with lesser spending on advertisements.
 - Some brands are doing well on the quick commerce channel. Marico will experiment more across channels.

International business

- **Bangladesh** Recovered on a broad-based portfolio. Expected to grow in double digits. Revenue share to reduce from 50% in FY22 to 47% by FY25F. Parachute dependence has been reduced led by healthy growth from baby care and other offerings in the region. Management believes the forex problem will improve gradually going ahead.
- Vietnam HPC category saw a slowdown.
- **MENA** Hair oils are doing well in Egypt.
- South Africa Ethnic hair care drove a 13% CC growth.

Input costs and margins

- Margins can improve over three-to-four years. In the food business, an 800bp gross margin expansion (most of which is sustainable, as per management) gave a good ramp-up. Some other initiatives were taken in FY24 which will flow through in FY25F. Saffola master brand advertising optimization will also aid in improving margins. Premiumization will aid in improving margins as well.
- No improvement expected in FY25F but will be visible going ahead.
- Project Setu won't impact profitability, as per management.
- Will aim to maintain margins but improve profitability growth.

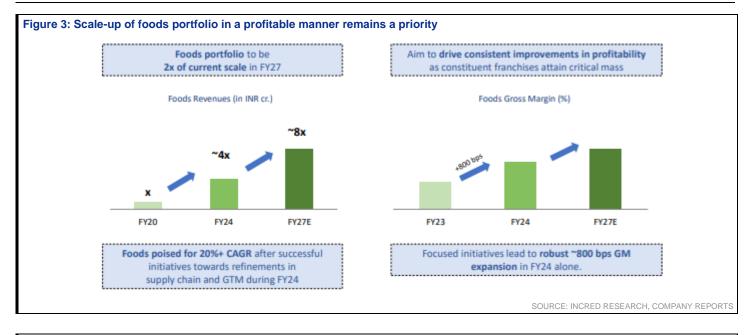

Outlook

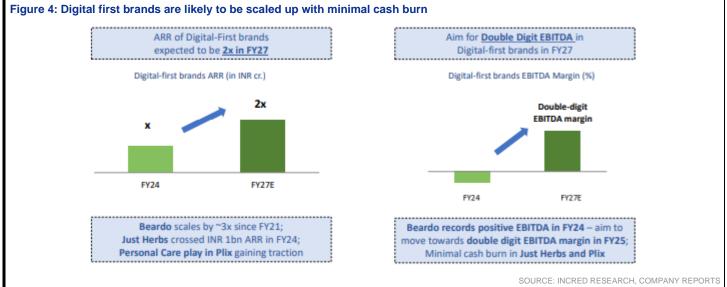

- Building blocks are in place to drive double-digit growth going ahead. Operating margin is expected to structurally improve over the next few years.
- The double-digit sales growth outlook remains unchanged.

DISCLAIMER

This report (including the views and opinions expressed therein, and the information comprised therein) has been prepared by Incred Research Services Private Ltd.(formerly known as Earnest Innovation Partners Private Limited) (hereinafter referred to as "IRSPL"). IRSPL is registered with SEBI as a Research Analyst vide Registration No. INH000011024. Pursuant to a trademark agreement, IRSPL has adopted "Incred Equities" as its trademark for use in this report.

The term "IRSPL" shall, unless the context otherwise requires, mean IRSPL and its affiliates, subsidiaries and related companies. This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject IRSPL and its affiliates/group companies to registration or licensing requirements within such jurisdictions.

This report is being supplied to you strictly on the basis that it will remain confidential. No part of this report may be (i) copied, photocopied, duplicated, stored or reproduced in any form by any means; or (ii) redistributed or passed on, directly or indirectly, to any other person in whole or in part, for any purpose without the prior written consent of IRSPL.

The information contained in this report is prepared from data believed to be correct and reliable at the time of issue of this report.

IRSPL is not required to issue regular reports on the subject matter of this report at any frequency and it may cease to do so or change the periodicity of reports at any time. IRSPL is not under any obligation to update this report in the event of a material change to the information contained in this report. IRSPL has not any and will not accept any, obligation to (i) check or ensure that the contents of this report remain current, reliable or relevant; (ii) ensure that the content of this report constitutes all the information a prospective investor may require; (iii) ensure the adequacy, accuracy, completeness, reliability or fairness of any views, opinions and information, and accordingly, IRSPL and its affiliates/group companies (and their respective directors, associates, connected persons and/or employees) shall not be liable in any manner whatsoever for any consequences (including but not limited to any direct, indirect or consequential losses, loss of profits and damages) of any reliance thereon or usage thereof.

Unless otherwise specified, this report is based upon reasonable sources. Such sources will, unless otherwise specified, for market data, be market data and prices available from the main stock exchange or market where the relevant security is listed, or, where appropriate, any other market. Information on the accounts and business of company(ies) will generally be based on published statements of the company(ies), information disseminated by regulatory information services, other publicly available information and information resulting from our research. Whilst every effort is made to ensure that statements of facts made in this report are accurate, all estimates, projections, forecasts, expressions of opinion and other subjective judgments contained in this report are based on assumptions considered to be reasonable as of the date of the document in which they are contained and must not be construed as a representation that the matters referred to therein will occur. Past performance is not a reliable indicator of future performance. The value of investments may go down as well as up and those investing may, depending on the investments in question, lose more than the initial investment. No report shall constitute an offer or an invitation by or on behalf of IRSPL and its affiliates/group companies to any person to buy or sell any investments.

The opinions expressed are based on information which are believed to be accurate and complete and obtained through reliable public or other nonconfidential sources at the time made. (Information barriers and other arrangements may be established where necessary to prevent conflicts of interests arising. However, the analyst(s) may receive compensation that is based on his/their coverage of company(ies) in the performance of his/their duties or the performance of his/their recommendations. In reviewing this report, an investor should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additional information is, subject to the duties of confidentiality, available on request. The report is not a "prospectus" as defined under Indian Law, including the Companies Act, 2013, and is not, and shall not be, approved by, or filed or registered with, any Indian regulator, including any Registrar of Companies in India, SEBI, any Indian stock exchange, or the Reserve Bank of India. No offer, or invitation to offer, or solicitation of subscription with respect to any such securities listed or proposed to be listed in India is being made, or intended to be made, to the public, or to any member or section of the public in India, through or pursuant to this report.

The research analysts, strategists or economists principally responsible for the preparation of this research report are segregated from the other activities of IRSPL. Information barriers and other arrangements have been established, as required, to prevent any conflicts of interests.

The research analysts, strategists or economists principally responsible for the preparation of this research report are segregated from the other activities of IRSPL. Information barriers and other arrangements have been established, as required, to prevent any conflicts of interests.

IRSPL may have issued other reports (based on technical analysis, event specific, short term views etc.) that are inconsistent with and reach different conclusion from the information presented in this report.
