Overweight (no change)

Highlighted Companies

Larsen & Toubro Ltd

ADD, TP Rs3965, Rs3798 close

Larsen & Toubro (L&T) is well placed to achieve its 'Lakshya 2026' revenue of Rs2.7tr and order inflow of Rs3.7tr, translating into a revenue and order inflow CAGR of 14%. L&T plans to achieve a RoE of over 18% in FY26F vs. a RoE of 13.8% in FY23.

KEC International Ltd ADD, TP Rs800, Rs770 close

KEC International has a strong Rs1,250bn order pipeline, of which the transmission segment accounts for Rs750bn while the railway and civil segments account for Rs200-250bn each. The company has a healthy order book, with L1 status orders worth over Rs380bn. We expect the company to report strong revenue growth in the coming quarters.

Skipper Limited

ADD, TP Rs400, Rs323 close

We expect Skipper to maintain consistent margins and a healthy revenue CAGR of 28% over FY23-26F led by a strong order book for the engineering products segment and healthy performance of the polymer products segment. The domestic T&D environment is showing signs of a rebound after a two-year slowdown.

Ind Goods & Services

4QFY24 results preview

- We expect a healthy revenue growth of 16% YoY in 4QFY24F led by the pickup in execution, improved opening order book position and firm pricing.
- The EBITDA margin in 4QFY24F is likely to decrease by 29bp YoY, mainly due to lower margin in L&T.
- We remain Overweight on the sector, with our preferred stocks being Larsen & Toubro, KEC International, and Skipper.

Revenue growth along with operating leverage to continue

We expect our capital goods coverage universe to continue posting healthy sales growth in 4QFY24F led by strong execution and pricing action along with an improved opening order book position. We expect an overall aggregate revenue growth of 16% YoY (+20% QoQ) for the companies in our coverage universe. The EBITDA margin, at an aggregate level, in 4QFY24F is likely to decrease by 29bp YoY, mainly due to the lower margin in L&T which is offset against softening commodity prices and operational efficiency in most companies. We expect the core PAT of our coverage universe to grow by ~18% YoY (~40% QoQ). Our PAT estimates are below Bloomberg consensus estimates for Kalpataru Projects International, Siemens and Voltas while they are above in the case of Cummins India and Thermax. As regards the EBITDA margin, our estimates are below Bloomberg consensus estimates for Kalpataru and KEC international.

Domestic order placement activity likely to moderate

While the launch of the production-linked incentive or PLI schemes by the government had a positive impact on the Indian economy and they are expected to attract a capex of ~Rs3tr over the next five years, but in the near term, private capex is likely to remain muted due to the forthcoming general elections in India. In 4QFY24, the Centre's new investments declined by 30% YoY but improved 235% QoQ. We expect the order inflow of our coverage universe to clock a 14% CAGR over FY23-25F. The order inflow for key sectors like power T&D, railways, metro rail and water supply witnessed a steady growth in FY24 led by government's capex. On the private capex front, investment activity witnessed selective growth in the businesses such as data centres, industrial automation, cement, metals & mining, and PLI capex. We expect the order placement momentum to be back on track after the general elections. New orders announced by L&T in 4QFY24 stood at ~Rs600bn.

Maintain ADD rating on L&T, KEC International & Thermax

We remain Overweight on the industrial sector as valuations currently factor in a strong capex recovery. Total capex was up 15% YoY in 1HFY24. Public sector companies' capex may moderate in the coming quarters but pick up post general elections. The government has maintained its strong capex in key infrastructure-related sectors like roads, railways including metro rail, water supply & power T&D. We have an ADD rating on ABB India, L&T, KEC International, Thermax, Siemens and Skipper as their order backlog provides revenue visibility, apart from reasonable valuations. We have a HOLD rating on Voltas (losses in projects business) & Cummins India due to weak export demand and rich valuations.
