Sales growth slowdown is temporary

- Normalized 3Q PAT grew by 20% yoy and 18% qoq to Rs8.8bn, 5% below our estimate, due to weak sales growth (8% yoy) and higher interest costs.
- Cut our sales estimates by 4-5% due to a double-digit dip in developed markets but with the foray into consumer electronics, sharp revenue growth is likely.
- Steep stock price decline factors in tariff war fears. Upgrade its rating to ADD.

Sales performance disappoints in 3QFY25

Samvardhana Motherson International or SAMIL's 3QFY25 EBITDA growth of 10% qoq to Rs26.9bn was below our estimate (2%) but beat Bloomberg (BB) consensus estimate (4%). Sales decline in wiring (-4% qoq) and vision system (-2% qoq) divisions led to revenue miss of 9% vs. our estimate. The EBITDA margin at 9.7% was up 49bp yoy and 91bp qoq, mainly driven by the rise in inventory (4% of sales). The EBITDA margin improved for modules (+56bp qoq) and wiring harness (+61bp qoq). Normalized PAT grew by 18% qoq to Rs8.8bn, 5% below our/BB consensus estimates.

Management conference-call highlights

Management cut its capex guidance by 10% for FY25F to Rs45bn due to slowdown in the global premium car segment in developed nations. In 3Q, it made two acquisitions and formed two new joint ventures. With global tensions easing, management expects reduced supply chain disruptions, leading to a lower working capital requirement.

PAT cut by 4-6% for FY25F-27F

The slowdown in developed markets, especially Europe, impacting SAMIL's revenue growth, despite new M&As is a disappointment, leading us to cut FY25F-26F sales by 4-5%. Strong EBITDA margin improvement in 3Q limits the EBITDA cut to ~2% for FY25F-27F. However, the slower-than-expected interest costs reduction leads to PAT cut of 4-6% for FY25F-27F. Building in equity dilution from the recent qualified institutional placement or QIP of shares and compulsorily convertible debentures or CCDs, the EPS cut stands at ~10% for FY25F-27F.

Upgrade to ADD rating, but with a lower target price of Rs152

The sharp 40% stock price correction from its historic peak, we feel, factors in the worst of tariff war concerns. With the US easing its tariff stance, we feel that SAMIL, having a global presence, is better positioned to hand-hold its customers for local-local manufacturing with limited supply chain disruption. With 14 plants to be commissioned in the next six quarters and an improved appetite for acquisitions (net D:EBITDA ratio easing to 0.9x), we upgrade our rating on SAMIL to ADD (from HOLD) but with a lower SOTP-based target price of Rs152 (Rs173 earlier). Key downside risk is the prolonged tariff and geopolitical tensions impacting sales performance.

Sales growth slowdown is temporary

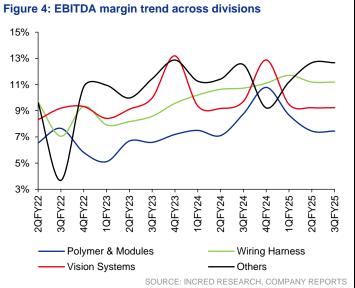

Management conference-call highlights >

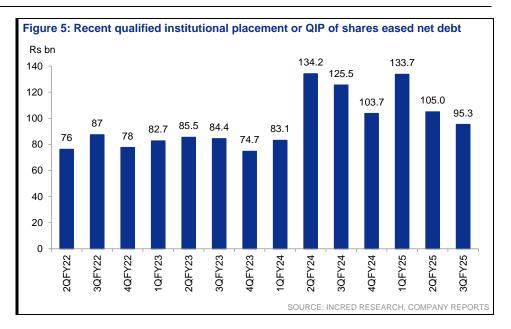

- Automotive industry: Management indicated that premium car makers are recalibrating their alternate fuel vehicle strategy. While mass car makers continue to see momentum in electric vehicle or EV and hybrid cars, this transition is unlikely to impact SAMIL as 90% of its portfolio is agnostic. During the quarter, global passenger vehicle or PV volume remained flattish while commercial vehicle or CV volume declined yoy. The decline in PV volume in Europe and North America was offset mainly by growth in China and India.
- **Outlook**: Macroeconomic indicators remain largely stable. Volatility in commodity and energy prices in Europe continues; however, the supply chain environment has seen an improvement. During the quarter, the shipping container crisis has eased, which is likely to improve the working capital cycle.
- **Financial performance**: Consolidated EBITDA margin grew by 91bp qoq and 49bp yoy on the back of cost-saving initiatives, localization efforts and pass-through of elevated costs to customers. Interest costs during the quarter were elevated due to a Rs350-400m forex loss, and accrual of cumulative debenture and QIP activities, but they are likely to decline by 50-75bp in 4QFY25F.
- **Capex guidance**: Management has further reduced its capex guidance by Rs5bn to Rs45bn +/- 5%. The change in capex is largely attributed to aligning with evolving market dynamics in the automotive segment while non-auto capex continues as per its plan.
- **M&A**: SAMIL announced two new acquisitions during 3Q Atsumitec (with FY24 revenue of US\$412m) and Baldi Auto to enable further diversification and vertical integration. The company has formed two new joint ventures with Sanko, Japan and Matsui Manufacturing Company, Japan, in packaging business (logistics solutions business division) and process segment (industrial automation), respectively.
- **Greenfield projects**: During the quarter, two greenfield projects commenced operations (consumer electronics and precision metals) and six new greenfield projects are expected to come on stream in the next two quarters.
- **Consumer electronics plant**: During the quarter, the first plant (consumer electronics) started operations, and currently it is in ramp-up mode. The second plant is likely to start operations in 2QFY26F followed by the third plant in FY27F. Management's plan is to incur a total capex of Rs26bn, out of which Rs7-8bn has already been incurred.
- Emerging businesses: The sequential revenue dip was due to the decline in India CV and heavy equipment segments. The acquisition of Atsumitec will benefit SAMIL as there will be expansion of its share of the business with Japanese OEMs,
- Aerospace: SAMIL has become a tier-1 supplier for Airbus commercial aircraft; however, it is already a tier-1 supplier for Airbus helicopters and Airbus defence and space divisions. Revenue is likely to flow in from 1QFY26F, and currently it has a large order book from two major customers.
